

PROFILE

Product and technology executive with 20+ years spanning venture-building, engineering leadership, and, most recently, agent-orchestrated software delivery. Currently architect and director of Steinlog, a live Cloudflare-native SaaS platform selling into the Dutch public sector, alongside a portfolio of AI/LLM, mobile, and e-commerce builds delivered through Dago Digital. Previously co-founded and led the turnaround of an Australian superannuation fintech, and served as Chief Solutions Officer on an ~\$8m medtech program. Decisions, architecture, and governance are mine; execution on current builds is carried out largely by orchestrated fleets of AI coding agents under my direction, with eval gates and human-approval steps standing in for a conventional delivery team.

EXPERIENCE

Programme Director & Technology Architect (Independent, Contract) · Dago Digital Sydney / Gdańsk · 04.2020 – present

- Architect and director of Steinlog, a live Cloudflare-native SaaS procurement-intelligence platform selling into the Dutch public sector (a Swedish market adapter is in design): multi-tenant isolation enforced structurally via Durable-Object identity, no shared tenant_id column; an 84-case golden-plus-adversarial eval suite gates every change to production answers; 2,000+ automated tests. Execution is carried out largely by an orchestrated fleet of AI coding agents under my direction.
- Designed and built a portfolio of AI/LLM, mobile, and e-commerce ventures: native iOS/Android apps (Kontexa), a bespoke e-commerce platform (frontend, backend, payments, analytics), and RAG/graphRAG pipelines (Neo4j) with agentic automation, on SvelteKit/TypeScript, Cloudflare Workers, and AWS.
- Chief Solutions Officer for a medtech venture: owned an ~\$8m program budget, managed a regulatory submission, implemented S&OP to the standard used at Coca-Cola Australia, resolved issues across the IoT stack, and prepared investor materials and the data room for a \$20m Series D round.
- Architected the technology stack for a climate-investment platform: vendor selection, delivery scope, and oversight of an external development team; designed and built the web-app MVP; defined the API strategy for fund administrators, managers, and data providers.
- Directly managed and mentored 3–5 project managers across concurrent client engagements, owning budget, scope, schedule, risk, and client relationships.
- Ran parallel technology and advisory engagements for external clients across fintech, investment, medtech, and HR — end to end, from scoping and budget through delivery.

Co-Founder, Head of Strategy · Australian Superannuation Fintech (name withheld) Sydney · 2017 – 2020

- Co-founded a superannuation (pension) fund built for women (employer name withheld here; details on request): responsible for strategy, technology architecture, and product design from zero.
- Led the company through a serious crisis: managed board and investor expectations, designed and executed a recovery plan — the turnaround enabled the next financing round.
- Raised AUD 3.5m across angel and seed rounds.

EARLIER

Polish Investment and Trade Agency (PAIH), Sydney (2018) — Head of Sydney Office; launched the agency's Australian office from zero; opening event with the President of Poland

Morphic Asset Management, Sydney (2013 – 2017) — Investment Analyst; global-equities investment analyst; built quantamental screening and short-selling frameworks for the financials and transport sectors

Global Governance Institute, Brussels (2010 – 2011) — Co-Founder, Director of Projects; co-founded a Brussels-based think tank on international security policy

Seabury Aviation & Aerospace, London / New York (2007 – 2010) — Senior Analyst; operational restructuring for global carriers, including Qantas, US Airways, and Etihad

Minova International (now Orica), Oxford (2005 – 2007) — Group Strategy Analyst; M&A due diligence and corporate strategy, reporting to the CEO

EDUCATION

University of Oxford — Politics, Philosophy and Economics (MA), 2005

LANGUAGES

Polish — native
English — fluent
